

**The *All of Us*  
Research Program  
Virtual Event:  
Precision Medicine  
for Breast Cancer**

# Join Us

Learn how you can be included in shaping the future of health care for you, your family, your community, and generations to come by joining us for an *All of Us* Research Program virtual event.

**October  
28th**

Thursday, October 28th, 2021  
4:00 p.m. – 5:00 p.m.  
Register online at:  
<https://bit.ly/3v0P4pU>

## Presented by:

Dr. Hannah Lui Park from UCI School of Medicine will discuss the role of precision medicine in guiding breast cancer screening, prevention, & treatment. She will present current practice & future opportunities to use genetic markers to guide clinical care & health recommendations.

At the moment, health care is often one-size-fits-all. When we visit the doctor, our treatments are often the same. We think one day health care should be tailored to you. This is called precision medicine. And research can help us get there. How? By creating a resource that may allow researchers to conduct thousands of studies on health and disease. Join us. The future of health begins with you.
